

## Fund Update

### Smartshares Exchange Traded Funds

#### Australian Dividend Fund

For the quarter ended 30 September 2016

This fund update was first made publicly available on 28 October 2016.

#### What is the purpose of this update?

This document tells you how the Australian Dividend Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

#### Description of this fund

The Australian Dividend Fund invests in financial products listed on the Australian Securities Exchange and is designed to track the return on the S&P/ASX Dividend Opportunities Index.

Total value of the fund:	\$61,961,182
The date the fund started:	16 December 2014

#### What are the risks of investing?

##### Risk indicator for the Australian Dividend Fund<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/tools/investor-kickstarter>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2016. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

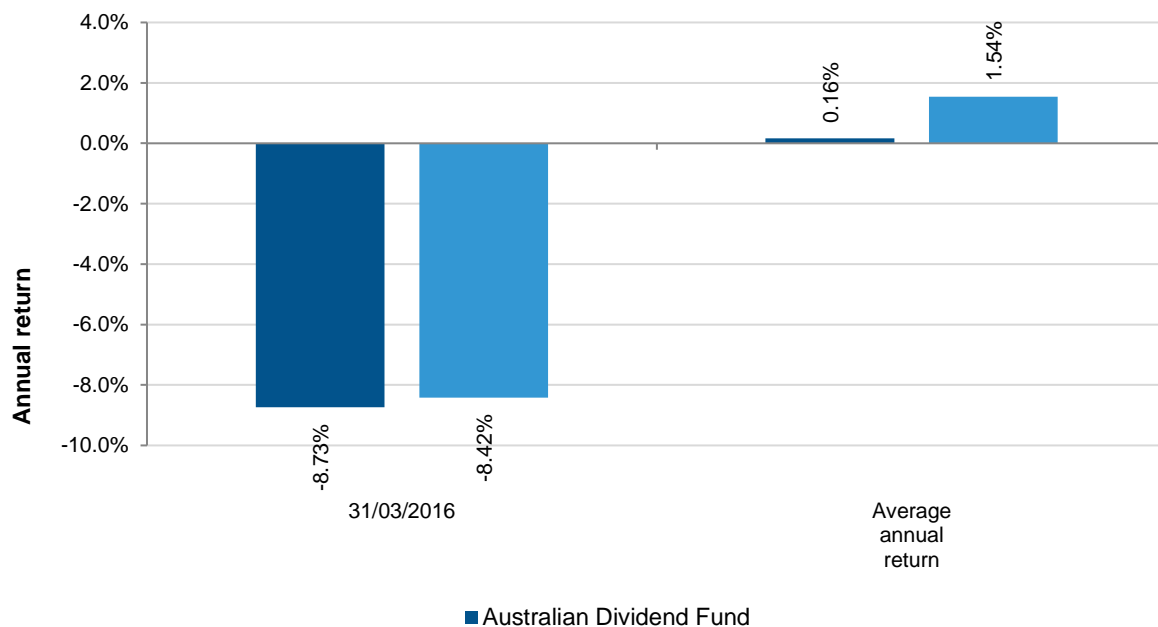

See the Product Disclosure Statement for the Smartshares Exchange Traded Funds (**PDS**) for more information about the risks associated with investing in this fund.

### How has the fund performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	-1.33%
<b>Annual return</b> (after deductions for charges but before tax)	-0.04%
<b>Market index annual return</b> (reflects no deduction for charges and tax)	0.37%

The market index annual return is based on the annual return for the S&P/ASX Dividend Opportunities Index (NZD). Additional information about the market index is available on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose)

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2016.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at 28%.

### What fees are investors charged?

Investors in the Australian Dividend Fund are charged fund charges. In the year to 31 March 2016 these were:

	% per annum of fund's net asset value
<b>Total fund charges</b>	0.54%
Which are made up of:	
<b>Total management and administration charges</b>	0.54%
Including:	
Manager's basic fee	0.54%
Other management and administration charges	0.00%
<b>Total performance-based fees</b>	0.00%
<b>Other charges</b>	Dollar amount per investor
Not applicable	\$0.00

Investors may also be charged individual action fees for specific actions or decisions (for example, for initial contributions to the fund). See the PDS for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

Tara had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Tara incurred a loss after fund charges were deducted of -\$133 (that is -1.33% of her initial \$10,000). Tara paid no other charges. This gives Tara a total loss after tax of -\$133 for the year.

## What does the fund invest in?

### Actual investment mix

This shows the types of assets that the fund invests in.

## Further information

You can also obtain this information, the PDS and some additional information, from the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose)

## Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 3 years and 2 months of market index returns.
