|-----------------|------------|---|---|---|-------------|----------------|
| 1               | 2          | 3 | 4 | 5 | 6           | 7              |

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <a href="https://www.sorted.org.nz/tools/investor-kickstarter">https://www.sorted.org.nz/tools/investor-kickstarter</a>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2016. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement for the Smartshares Exchange Traded Funds (**PDS**) for more information about the risks associated with investing in this fund.

#### **Notes**

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 4 years and 10 months of market index returns.
- 2 The Australian Top 20 Fund invests in listed property trusts included in the S&P/ASX 20 Index. This is included in its asset allocation to Australasian equities.
