1 The Fund is not managed with the objective of achieving a particular return level relative to a benchmark index. However, to compare the performance of the Fund with a broad measure of market performance, reference may be made to the S&P/NZX 50 Portfolio Index

2 Sectors are determined using the GICS 11 classification standards

Attributions NZ Core Equity Trust vs S&P/NZX 50 Portfolio Index Total Return

Display Currency: NZD. Numbers may not total 100% due to rounding. Companies are classified as small and large by computing a breakpoint based on total market capitalization. Large and small are defined annually by % of market cap, for the latest definition please contact DFA Australia. Designations between value and growth are constructed based on price to book ratios. Value is defined as the 50% of market cap with the lowest price to book ratios and growth is the highest 50%. S&P/NZX 50 Portfolio Index Total Return provided by S&P DJI. The S&P data are provided by Standard & Poor's Index Services Group.
